SKILLS

- **Languages:** Python, C, C++, JavaScript
- **Technologies:** NumPy, Pandas, Matplotlib, Scikit-learn
- **Databases/Tools:** MySQL, MongoDB, Git, GitHub
- **Soft Skills:** Problem-solving, Team collaboration, Time management, Adaptability

PROJECTS

- AI-Based UV Radiation Monitoring & Alert System:**

Mar 2026 - May 2026

 - Developed an intelligent UV radiation monitoring system to analyze environmental data and provide personalized exposure alerts.
 - Collected and processed UV-related sensor/API data using Python to identify potentially harmful radiation levels.
 - Implemented a machine-learning approach to classify UV exposure conditions and generate risk-based recommendations.
 - Designed an automated alert mechanism to notify users when radiation levels exceed predefined safety thresholds.
 - Tech Stack: Python, machine learning, Arduino, sensors, Discord webhooks, and Kaggle.
- AI-Sustainable E-waste Management System:**

Oct 2025 - Jan 2026

 - Developed a machine-learning model to predict/classify e-waste management using a structured dataset containing 3 records/features.
 - Performed data preprocessing, handled missing values, selected features, and conducted exploratory data analysis to prepare the dataset for modeling.
 - Trained and compared multiple machine learning algorithms, including CNNs and computer vision.
 - Evaluated model performance using 88% accuracy and selected the best-performing model.
 - Tech Stack: Python, Pandas, NumPy, Matplotlib, Scikit-learn, Jupyter Notebook
- AI-Powered Data Automation System:**

Jun 2025 - Sep 2025

 - Built an automated system that accepts structured user input and processes it using an AI-powered API.
 - Integrated the Google Sheets API to store and organize generated outputs for further analysis automatically.
 - Designed an automated data-processing workflow that reduced repetitive manual data entry and organization.
 - Implemented input validation and structured output formatting to maintain consistency across generated records.
 - Tech Stack: Python, REST API, Google Sheets API, Google API, JSON.

CERTIFICATES

- | | |
|---|----------|
| • Python for Data Science and AI | Mar 2026 |
| • Introduction to Artificial Intelligence | Apr 2026 |
| • Introduction to Machine Learning | Aug 2026 |

ACHIEVEMENTS

- Solved more than **100** programming problems on online coding platforms during regular practice and learning.
- Ranked Top 10 among 50+ teams in hackathon for developing an AI-sustainable e-waste management system.

EDUCATION

- | | |
|--|---|
| Lovely Professional University
• Bachelor of Technology - Computer Science and Engineering (AI and ML) | Phagwara, Punjab
Aug 2026 - Present |
| Kendriya Vidyalaya Khurda Road
Higher Secondary Education CBSE | Khordha , Odisha
Jun 2023 - Mar 2025 |
| Kendriya Vidyalaya Khurda Road
Secondary Education CBSE | Khordha , Odisha
May 2023 |
